IF YOU SEE SOMETHING, SAY SOMETHING!

If you have concerns with your employer's PPE policy, share your concerns with your manager, then unit director, followed by hospital leadership. In an effort to internally address concerns, follow your employer's protocol for notifying Quality & Infection Prevention, Risk Management, and Human Resources with your safety concerns.

After speaking with your leadership internally, if your concerns are not resolved, please contact the Indiana State Department of Health: Complaint Report Line 1-800-246-8909 or Complaint Report forms can be found at [IN STATE DEPARTMENT OF HEALTH COMPLAINT REPORTING](#) .

If you are employed by an accredited organization, safety events can be reported through the accreditor's online portal:
